Inclusive dilepton $t\bar{t}$ calibration; $\mu_R = \mu_F = m_t$, NNPDF3.1 NLO
NLO differential / NLO total
Expanded normalized distribution
Supplied NLO reference
Generated strict NLO (S)
Normalized density in $\Delta\phi/\pi$
Residual / combined MC error
$\Delta\phi(\ell^+, \ell^-)/\pi$
Pilot MC errors conditional on trained grids; correlated bin residuals are not a global fit test.
